ENERGY CONSUMPTION CHART

LED lights last longer and have less long-term operating costs than Halogen, Metal Halide, HPS, Fluorescent & Compact Fluorescent bulbs.

SAVE UP TO 80% ON YOUR LIGHTING ELECTRIC COSTS

Customers that already trusted us:

FINANCING OPTIONS

We have flexible options available to meet your specific financial needs.

LEASING

Leasing is a great way to convert your lighting to LED without a large capital expense up front. Often fully-deductible, you'll have a fixed monthly payment that's usually less than the savings you'll receive from your electric bill, creating a positive cash flow.

FINANCING

If you require financing, we have solutions available through one of our lending partners.

DIRECT PURCHASE

If you have an existing maintenance plan, we will work within your budget to create an LED solution.
